Endur E7

1200 x 800

Available in
5
PP

Robust 3-runner plastic pallet for applications with high rotations

Made of impact-resistant PP – no metal reinforcements – this pallet is ideal for semi-hygienic applications and for high-rotation usage such as open or closed pools. The pallet deck is made using gas-assist technology, meaning that internal hollow channels make the pallet more rigid. This benefit is especially useful when the pallet is used in racks. Solid runners, double-walled recessed blocks and superb design make this pallet extremely robust and ensure a long service life.

Bottom support

> **3 runners (3R)**

Available with various anti-slip options

Rounded perimeter border reduces risk of fork access damage.

Deck options

> **open deck (OD)**

> **closed deck (CD)**

Available with or without safety rim
